INVESTMENT OBJECTIVE

This investment strategy aims to achieve a blend of capital appreciation and income generation by maintaining a balanced exposure to equity and debt instruments, with a minimum of 25% in each, while utilizing up to 25% in short derivative positions to enhance returns and manage risk. There is no assurance that the investment objective of the Investment strategy will be achieved.

RISK BAND

*The Risk Band has been as specified by AMFI.

MONTHLY FUND COMMENTARY

qsif Hybrid Long-Short Fund offers a compelling solution in the current phase of market turbulence. By integrating directional equity exposure with fixed income and yield-generating assets, hybrid long short strategies help cushion portfolios against elevated equity volatility while enhancing return predictability and downside protection. The fund continues to maintain an optimal mix of directional equity, InvITs, and fixed income securities. This allocation remains dynamic, with continuous rebalancing driven by evolving market conditions, valuation signals, and risk-reward considerations. Within equities, the fund remains well diversified across large, mid and small-caps with an overweight stance on telecom and underweight stance on financial services. During the month, the fund maintained an average equity deployment (Long + short) of approximately 55%, average long exposure: ~46%, average short exposure: ~9%, average net exposure: ~37%, month-end portfolio beta: 0.35.
